DETAILED ACTION

Allowable Subject Matter

1. Claims 30-39 and 43-57 are allowed.
2. The following is an examiner's statement of reasons for allowance: The prior art of record fails to teach or fairly suggest an apparatus for coating substrates, comprising: a substrate holder for holding thereon a substrate in such a way that a surface of said substrate that is to be coated is exposed and directed downwardly; a cover that is securable to said substrate holder, such that the cover is freely rotatable therewith, wherein said cover, together with said substrate holder, are adapted to form a sealed chamber for receiving a substrate; **a single means for rotating both said substrate holder and said cover**; and a notch provided in an outer region of a portion of said cover that defines a chamber, wherein said notch tapers radially outwardly, and wherein said notch is inclined on a side thereof that faces said substrate holder. Nor does the prior art of record teach or fairly suggest a method for coating substrates using the apparatus described above. Specifically, the prior art fails to teach or fairly suggest a single means for rotating both said substrate holder and said cover as noted by the bolded text. Further, no other piece of prior art was located that provided proper motivation for incorporating the bolded feature with the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
